## Installation on Windows

### Install Using PowerShell

Download and execute the installer script:

```
powershell -ExecutionPolicy Bypass -c "irm https://astral.sh/uv/install.ps1 | iex"
```

### Install a Specific Version

```
powershell -ExecutionPolicy Bypass -c "irm https://astral.sh/uv/0.9.21/install.ps1 | iex"
```

### Verify UV Installation

```
uv -V
```

## Update UV to the Latest Version

Standalone installer:

```
uv self update
```

Installed via pip:

```
pip install --upgrade uv
```

## Initialize a New Project with a Specific Python Version

```
uv init my-project --python 3.9
```

## Install UV When Python Is Already Installed

Using `pip`:

```
pip install uv
```

Using `pipx`:

```
pipx install uv
```

## List Installed Python Versions

```
uv python list
```

---

## Installation on macOS

### Install Using curl (Recommended)

```
curl -LsSf https://astral.sh/uv/install.sh | sh
```

### **Install Using wget (Alternative)**

```
wget -qO- https://astral.sh/uv/install.sh | sh
```

### **Install a Specific Version**

```
curl -LsSf https://astral.sh/uv/0.9.21/install.sh | sh
```
